

# GUARD HOUSES

Carr Concrete guard houses are a tough, safe, secure choice to protect the people that protect your facility. Built to withstand natural elements, they can be adapted to protect from man made intrusions including bullet and blast resistance.

Carr Concrete has manufactured precast concrete buildings since 1989, using the highest quality products and standards in the industry. We continually work to improve the quality and processes that go into manufacturing our buildings.

Carr-Bilt buildings have a tough exterior, but also provide a comfortable interior for your personnel. With hundreds of available options, Carr-Bilt guard houses will meet the specific needs of your facility by protecting people and grounds, while giving you peace of mind.
