Carr-Bilt precast concrete standard storage buildings are the industry's best choice for protecting your valuable items. Carr Concrete has been manufacturing buildings since 1989, and continually works to ensure only the highest quality standards and products are used for our buildings. Carr-Bilt standard storage buildings arrive at your site ready for immediate use. The building is preassembled at our plant and shipped directly to your site. The building is then removed from the truck as one complete unit and placed on your prepared pad – eliminating the hassle of site management and allowing the building to be used once in place.

Carr-Bilt buildings won't give in to weather, vandals or time. Our standard storage buildings protect valuable records, athletic and maintenance equipment or whatever you need protected. With a multitude of options, a Carr-Bilt building can be modified to fit your specific requirements.

Options

- Door types & sizes
- Electrical systems
- Exterior finishes
- Security
- Ventilation
